

GitHub Repository Checklist

Use when setting up any new project repo under the RIPLRT org.

Repo name: _____ **Project lead:** _____ **Date:** _____

Setup

- ☐ Created under the RIPLRT GitHub organization
- ☐ Private by default (public only with PI approval)
- ☐ README.md describing the project + how to run it
- ☐ .gitignore excludes data/, secrets, large/binary files
- ☐ License decided (or "all rights reserved" if restricted)
- ☐ Standard structure: data/ R/src/ analysis/ outputs/ docs/

Reproducibility

- ☐ Environment pinned (renv.lock or requirements.txt/environment.yml)
- ☐ Raw data treated as read-only; cleaning is scripted
- ☐ Relative paths only

Collaboration

- ☐ Branch protection on main (PRs + review)
- ☐ Issues enabled; project board linked
- ☐ Collaborators added at least privilege
- ☐ Commit message conventions noted in README

Governance

- ☐ No restricted/identifiable data committed — ever
- ☐ No credentials/tokens in history
- ☐ Required data-attribution text noted in README
